# ArioPrint

## The digital Revolution

Arioli Group was established in 2012 with the merger between the metalworking company Arioli S.p.A., Brazzoli S.p.A. and the Austrian MHM GMBH.

Being one step ahead, thanks to the continuous innovation research developed by 20 technicians and engineers nowadays working in the R&D department, Arioli Group has today insert into its portfolio new products for each brand (Arioli, Brazzoli and MHM) and applied improvements to the existing one.

Year 2016 has been a real turning point for Arioli which placed on the market ArioPrint-16®, a

roll-to-roll digital printing machine designed by Arioli's R&D Team.

Arioli presented its new machine as the fastest printer for this segment, allowing the customer to choose between multiple resolutions combinations. The two models of the machine, ArioPrint-8® and ArioPrint-16®, are scanning printers with either 8 printing heads in 2 rows or 16 printing heads in 4 rows.

They incorporate 300dpi native resolution Kyocera's KJ4B printing head which are "double channel"; that

means they are 16 but with 2 different colours in each single head.  
 ArioPrint-16® can print from 300x300dpi to 1200x1200dpi. In the meantime, it also allows the customer to eventually choose any other possible combination (for example 300x600dpi or 600x900dpi).

The stiffness of the steel monolithic structure ensures essential precision for optimum printing results guaranteed over time. The use of optical fibers enables reaching high speed and data transfer between PC and printing heads.

ArioPrint-16® is also synonymous of flexibility; in fact, the machine is equipped with an "open system", in which both the rip software and the inks can be chosen based on customer needs.

Furthermore, the Arioli digital printer allows a full 2-meter printing width on woven and knitted fabrics with flexible resolutions. If you are looking for maximum speed without compromising the best jetting precision, ArioPrint is your best choice.

Operational from two major cities of Pakistan i.e. Lahore and Karachi the TEXSOL (PVT) LTD. covers the textile regions in southern and northern Pakistan. The company is the sole distributor and dealer of Arioli's Products in Pakistan. With the high end technical knowledge and team of experienced professionals, the TEXSOL successfully stands at a prominent position in the textile market. By stress on the product and sales management the TEXSOL strives to build strong relationships within the company and the textile market. TEXSOL holds expertise in selling wide range of textile solutions. For more details about Arioli's products, pls contact

Speed is nothing without **precision.**  
**Arioli knows it well.**

**If you are looking for maximum speed without compromising the best jetting precision, ArioPrint is your best choice.**

The winning features of ArioPrint are:

- High stiffness, obtained thanks to welded stabilized monolithic structure
- Direct drive kinematic system
- Data transmission by optical fibers
- Double channel printing head with 300 dpi native resolution
- Top printing quality at 250 mt/h with 600x600 dpi

**That's reality, not just a promise.**
